IEEEJ TRANSACTIONS ON ELECTRICAL AND ELECTRONIC ENGINEERING

www.interscience.wiley.com/TEEE

Print ISSN 1931-4973
Online ISSN 1931-4981

Official Journal of the Institute
of Electrical Engineers of Japan

Discover this journal online at
www.interscience.wiley.com

AIMS AND SCOPE

IEEJ Transactions on Electrical and Electronic Engineering (hereinafter called TEEE) publishes 6 times a year as an official journal of the Institute of Electrical Engineers of Japan (hereinafter "IEEJ"). This peer-reviewed journal contains original research papers and review articles on the most important and latest technological advances in core areas of Electrical and Electronic Engineering and related disciplines. The journal also publishes short communications reporting on the results of the latest research activities.

TEEE aims to provide a new forum for IEEJ members in Japan as well as fellow researchers in Electrical and Electronic Engineering from around the world to exchange ideas and research findings. To fully cover this wide field of study, IEEJ's five technical societies (subsidiary groups under IEEJ) take responsibility for editing one issue per year while additionally selecting issue topics and soliciting papers. Areas covered by the five technical societies are:

- Fundamentals and Materials
- Electric Power and Energy
- Electronics, Information and Systems
- Industry Applications
- Sensors and Micromachines

As an official journal of IEEJ, **TEEE** also provides reports on important conferences and meetings sponsored by the Institute.

MOST DOWNLOADED ARTICLES

- **RF MEMS technology**
Hyeon Cheol Kim, Kukjin Chun, Seoul National University, Korea (Vol.2, Issue 3)
- **Cathode technologies for field emission displays**
Masayoshi Nagao, National Institute of Advanced Industrial Science and Technology, Japan (Vol. 1 Issue 2)
- **Synthesis and characterization of long gold nanorods**
Ru-Shi Liu, Department of Chemistry, National Taiwan University;
Hao Ming Chen, Department of Chemistry, National Taiwan University;
Shu-Fen Hu, Institute of Electro-optical Science and Technology, National Taiwan Normal University, Taiwan (Vol. 2, Issue 4)
- **Trends of permanent-magnet synchronous machine drives**
Toshihiko Noguchi, Nagaoka University of Technology, Nagaoka, Japan (Vol. 2, Issue 2)

2008 SPECIAL RATES FOR IEEJ MEMBERS ONLY

- Print subscription: US\$72
- Special Introductory Online only Subscription: US\$50 (For Year 2008 only)
- Print plus online subscription: US\$79

Please also recommend your companies or librarian to subscribe this journal.

YOUR ADVANTAGES AS A CONTRIBUTOR

- Highest achievable quality standard guaranteed by an internal editorial team
- Double peer-reviewed
- Rewards for invited reviews
- Color images of featured articles at no additional cost

BENEFITS OF REGISTRATION

Registration on Wiley InterScience confers a host of benefits, including

- robust customization features,
- automatic content alerting, and
- Pay-Per-View options.

Registration is optional, cost-free, and involves no subscription or commitment. All registration information is kept private and confidential.
